CASE STUDY:
Multi-Cloud Management platform

Cloud Management Platform

Exec. Summary: Cloud Governance & Management platform in a MultiCloud setup

The requirement to be Agile as part of Digital transformation is fueling need of On Demand computing at a breakneck speed. Enterprises are adopting Hybrid cloud for agility, scalability and innovative solutions. This phenomenon has got accelerated in the prevailing COVID-19 pandemic situation.

Rapid cloud adoption and growth of shadow IT within an organization is increasing uncertainty around cost, compliance, security, and governance. Organizations have to maintain a balance between agility and associated risk(s).

Further, Enterprises are implementing a multi-cloud approach that requires third-party tools to manage multi cloud setup.

CIO, CISO, CFO, IT Leaders and administrators need the right visibility, insight and governance cost, assets and Information Security to manage their fast-growing cloud infrastructure.

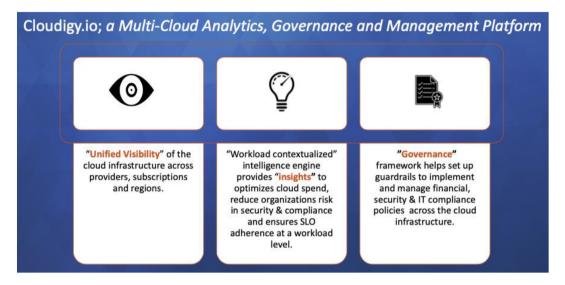

Giniminds has a platform called "Cloudigy"; a Cloud Governance and Management Platform.
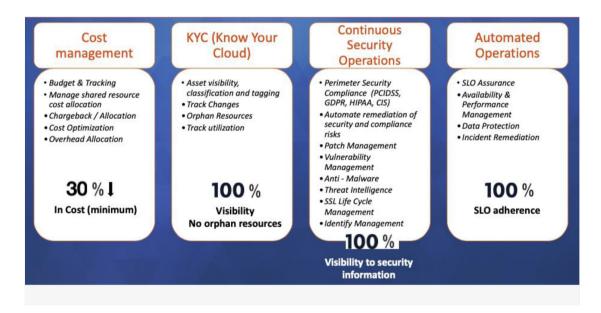

Cloudigy provides Cloudigy provides
• **unified visibility of the cloud infrastructure across providers, subscriptions and regions.**
• **Rich and relevant views and insights for users across the organization.**
• **Cloudigy's "workload contextualized" intelligence engine provides insights to optimizes cloud spend, reduce organizations risk in security & compliance and ensures SLO adherence at a workload level.**
• **Cloudigy's Governance framework helps set up guardrails to implement and manage IT, financial, security, compliance policies across the cloud infrastructure.**
