

## Transforming the IT Infrastructure for one of the leading manufacturing company in Middle East

### Exec. Summary: Transforming the IT Infrastructure

Every organization is going through digital transformation and rationalizing their IT strategy to enable their core business strategy.

The Leading Manufacturing company entrusted Giniminds with the responsibility to assess the existing IT landscape, gap assessment, define IT strategy for at least next 5 years, implement the strategy and manage it ongoing.

Giniminds did a detailed AS IS assessment of current IT land scape. Had discussion with relevant stakeholders (CEO, IT head, Application owners, IT team etc.) to understand the business expectation, road map, challenges etc.

The AS IS IT landscape details was documented to last minute details. Detailed recommendation covering each domain of IT Infrastructure (physical infra, Network, End computing, Server infrastructure, business application (SAP, PLC/SCADA) etc. was prepared calling out priority and cost estimate.

The business benefits derived by the organization are as follows

- **Future proof IT Infrastructure and make it ready for Digital transformation.**
- **Enhanced IT Resiliency and Reliability**
- **Embrace DevOps strategy to reduce “Time to market” for Business solutions.**
- **Ensure compliance to Industry and country specific Information Security standards.**
- **Outsourced IT Infra management enabling focus on “Core Business”.**
